Off-Shore for Success...

"...Your team's ability to gain understanding to the system and make recommendations was, in our opinion, incredible.

...In the past 12 years of working with programmers we have never encountered such a professional organization..."

**- Tim Singleton, President
PREMIER RESULTS, INC.**

"...We have found your knowledge, patience and training acumen to be virtually unmatched in the industry.

...Without your skills and guidance we would not have been able to meet our deadlines. To say that we were pleased with you would be an understatement..."

**- Norman Wazaney
INTERNATIONAL PAPER**

"...Some how when the bill arrives, it's a quarter of what we expected.

...We don't have our own computer staff, and if it weren't for Innov8 we would probably have to by now.

...We used their Off-Shore resources recently and updated our whole system to enable our next phase of growth. It's all very exciting..."

**- Jacob Gesthalter, President
VICOR INDUSTRIES, INC.**

"...Your team helps us deliver projects on time and on budget even during periods of peak demand.

...My technical team is often skeptical about training classes, but the one you did for us prior to our project kickoff was well received. I have no doubt you have helped improve the practices of my programming team..."

**- Carl Mix, President
APPLICATION RESULTS, INC.**

Methodology...

- Whether on-site at our customers in North America or off-shore at our facilities in **India**, clients receive the same high quality services.
- Each customer is given focused, total and individual care, customized to the nature of their business. The success of your business is the motivation and driving force for our success. Our consultants take direction from your team, leaving you the customer always in charge of key decisions.
- Our off-shore setup in **India** offers our customers a highly cost effective option to meet their requirements and achieve the business success they forecasted.
- A highly structured process coordinates both the on-site and off-shore teams in a 24X7 environment. The resulting productivity enables the completion of small projects to large scale applications on time and under budget.
