

Get A Head Start...

Consulting and Software companies need to be efficient in order to stay alive in today's business climate. No one wants to reinvent the Accounting Software wheel. Yet when you have an existing commitment to **Progress®**, you have to choose between vertical packages too specialized for your needs, and systems that cost more than your own software.

StepUp Accounting is the answer to that need.

Superior By Design...

All of our software has been designed with you, the Progress professional in mind.

- ✓ Extensible via well defined API's
- ✓ API's for External System tie-ins
- ✓ Easy to Support
- ✓ Modern Software Engineering Practices
- ✓ Documentation at the *Design Level*
- ✓ World Renowned Design Team
- ✓ "Web-Services" Ready!

Business Your Way...

We offer a number of partnership arrangements suited to your way of doing business.

- ✓ We maintain the code
- ✓ Upgrades at regular intervals
- ✓ We do the Support
- ✓ Commissions earned based on Sales Levels

Custom Arrangements

- ✓ Source Code – We provide the Support
- ✓ Commission sales – You provide Consulting
- ✓ Individually Tailored Programs available

StepUp For Success...

*"Incorporating **StepUp Accounting™** into our system just made good business sense. It's a local company with Progress based technology that seamlessly integrates with our existing application. We were worried about the amount of resources the integration would take. But we found their API and documentation so strong it took a fraction of the time we estimated, it kept our other project on track, and was all accomplished without any need for Innov8's assistance."*

*"We offer easy-to-use, functionally rich applications to even the smallest operators. Financials are just one more service we can provide our customers. **StepUp Accounting™** is totally in tune with their reasonable pricing and willingness to work with both us and our customers. We really feel like partners."*
